

Status of Women Council of the NWT

**NORTHERN WOMEN IN MINING,
OIL & GAS PROJECT
2007 - 2010**

Agenda

- **Status of Women Council of the NWT**
 - Mandate
 - Mission
- **Northern Women in Mining, Oil & Gas Project (NWMOG)**
 - Background
 - Premise & Research Question
 - Training Approach
 - Courses
 - Support Services
 - Evaluation Process
 - Results
 - Summary
- **Questions/Comments**

Status of Women Council of the NWT

Mandate

- The Council was established under the NWT Status of Women Council Act in April 1990. Its mandate is to work towards the equality of women through:
 - advice to the Government of the NWT
 - research
 - public education
 - advocating on behalf of women
 - assistance to women's groups and other groups working on issues of concern to women

Mission

- The Status of Women Council of the NWT is dedicated to achieving equality for all NWT women through:
 - public education and awareness
 - research
 - advocacy
 - community development
 - interagency cooperation
 - advice to government
 - identification and development of opportunities for women

Northern Women in Mining, Oil & Gas Project

Background

- NWT has experienced increased employment opportunities in the trades as a result of the demand for NWT's non-renewable resources
- Under-representation of women in the trades-based occupations of mining, oil, and gas
 - Between 1993 and 2006, 920 students enrolled in NWT apprenticeship programs – 47 were women (5.1%)
 - 23 of these 47 women (48%) entered the Food and Service Industry apprenticeships
 - Less than half (43%) of the women who entered any apprenticeship program, completed them

Background

Northwest Territories residents working in trades, transport and equipment operators and related occupations

[1] 2005 Socio-Economic Scan, NWT Bureau of Statistics.

Background

- Why are women not entering trades-based occupations?
- Anticipated Barriers:
 - Lack of appropriate education and skills
 - Often the (and sometimes only) primary caregiver
 - Limited training opportunities
 - Financial restrictions
 - Perception and traditional perspective that trades occupations are not for women
 - Social issues (i.e. abuse and addictions)

Premise & Research Question

- **Premise**
 - If the right training and skill development was provided to women, their representation in the trades-based occupations would increase
- **Research question**
 - Would implementing a dedicated, **women-only**, partnership based and strategic training program be an effective means to increase the interest level, participation, and retention rates of women in industrial and trades-based occupations in the mining, oil, and gas industry?

Training Approach

- Training was uniquely designed to promote change by :
 1. Increasing women's interest through information sessions about the trades-based women-only training, and employment opportunities
 2. Increasing their participation by providing access to the required knowledge and skills through hands-on and academic training
 3. Increase their retention by providing wrap-around social supports and employment that addressed barriers

Courses

- **Exposure Courses (11)**
 - Intention was for women to gain enough interest to want to pursue further formalized trades training
 - Carpentry / Yellowknife (7 courses offered) + 1 course in Fort Smith
 - ✦ 5-week courses offered mainly in the evenings
 - Heavy Equipment Operations course in Trout Lake
 - Summer Airport Maintenance course in Hay River

Courses

- **Builder Trades Helper**
 - 12 week full-time program, combining hands-on training with basic academics and a Ready to Work North program
 - Prepares women for entry-level employment opportunities in construction/maintenance
 - 3 courses offered during Project
 - Intention was for women to complete the BTH and then move on to more formalized academic training or attain employment

Courses

- **Trades Access Program**
 - 20-week academic program that challenges women to enter the Trades Entrance Exam
 - Course material includes Trades Math, Trades Science, Trades English, and Basic Introduction to Computers
 - 2 courses offered during Project
 - Intention was for women to write Trades Entrance Exam, move into Apprenticeship positions and/or attain employment in the trades

Support Services

- **Supports included:**
 - Referrals
 - Upgrading and tutoring (by professionals)
 - Personal counselling (by professionals and NWMOG staff)
 - Housing (advocacy, finding placements)
 - Financial Assistance (SFA eligibility, advocacy, budgeting workshops)
 - Transportation (i.e. bus passes, travel to and from home community)
 - Childcare (advocacy, finding placements)
 - Work clothing
 - Long-distance phone cards
 - Grocery assistance

Supports were provided to women once accepted into the training, and as long as needed

Evaluation Process

- Hired an external evaluator to both monitor and evaluate the Project
- Developed an evaluation framework at outset of the Project to guide the monitoring, evaluation, and reporting efforts
- Data mostly collected internally by the Project staff
- Monitoring reporting took place quarterly, with annual process (interim) evaluation reports conducted at the end of the first two fiscal years
- Summative evaluation

Results

- **Women who apply for this type of training are:**
 - between 25 and 44 years old
 - for the most part, live in communities outside of Yellowknife
 - are of the Dene Ancestry
 - are unemployed
 - have completed their High School Diploma as their highest level of education
- **High interest among northern women to find trades-related training and employment in their home communities**

Results

- The women-only aspect is important to women in order to sign up for non-traditional trades-related training
- Increasing amount of applications received each year:
 - Year 1 = 37 applications
 - Year 2 = 43 applications
 - Year 3 = 73 applications
- Participation rates most successful when hands-on training was incorporated/main focus

Results

- Wrap-around supports provided to the women increased their retention in the training and/or employment
- The top three wrap-around support services accessed by students:
 1. Transportation (88% of students)
 - Bus passes
 - Transportation to and from home community
 2. Work Clothing (79% of students)
 - Steel toe work boots
 - Hard hats, etc.
 3. Personal Counselling (76% of students)
 - Provided by professionals
 - Provided by NWMOG PC and PO in advocacy role

Results

- **Challenge meeting 2/3 course targets:**
 - Exposure = 100% of 100 women target met
 - BTH = 53% of 30 women target met (attrition)
 - TAP = 35% of 20 women target met (academic requirements)
- **Regardless of completion levels, women were provided with workplace readiness skills, even if they did not enter the trades**

Results

- Top three barriers identified by applicants, and are consistent with proposal research:
 - Lack of the right skills/education
 - Financial concerns
 - Image that it's a man's working environment
- Barriers identified will help government, industry, training institutions and non-profit government, industry, training institutions, and non profit organizations put a gender-based lens on their services

Summary

- Training women in trades will be more successful if programs:
 - are designed specifically for northern women and to address the actual challenges faced by northern women
 - are (initially) women-only
 - are designed specifically to train women in communities for the jobs available in their communities
 - use hands-on training as the main focus of the training

Summary

- Training women in trades will be more successful if programs:
 - use a partnership approach that includes industry, civil society, and federal, territorial and local governments
 - include supports and resources aimed at increasing the success rates of women in the program
 - include dedicated staff that are tasked with providing resources and supports for the project
